

# Web Analytics Reports

Last Modified on 24/01/2020 12:50 pm GMT

The Web Analytics Reports show how your WSS 2010 site is used, it shows how much storage is being used and how many hits each page gets.

1. Go to **Site Actions > Site Settings**.
2. Click on **Site Collection Web Analytics Report**
3. You will be presented with a summary similar to the below.

<b>Storage</b> This is the amount of disk space taken up by the content in your site collection. To view Web Discussions, go to the <a href="#">Manage Web Discussions</a> page.	Current storage used: 74 MB Percent used by Web Discussions: 0 % Maximum storage allowed: 1024 MB
<b>Users</b> This shows how many users have been added to the site collection, and what, if any, restrictions exist for how many users may be invited. For more details, go to the <a href="#">Site Web Analytics Reports</a> page.	Number of users: 0 users
<b>Activity</b> This section shows information on how often the site is being visited. For more details, go to the <a href="#">Site Web Analytics Reports</a> page.	Total hits: 980 Recent bandwidth use: 0 MB/day
