

Action Log

Last Modified on 18/09/2018 10:33 am BST

Action Log

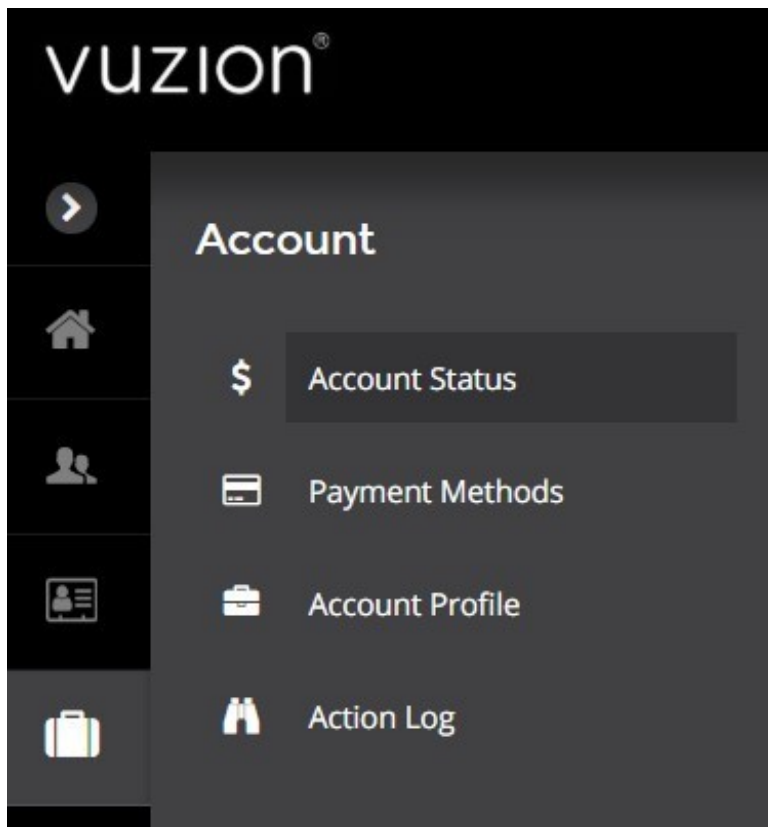

What is the Vuzion CORE Action Log in UX1?

The Action log in Vuzion CORE keeps track of all activity undertaken within the UX1 Control Panel.

If a new user is added, or another customer has been created, these actions will be stored in the Action Log so Partners have an audit history of what has happened on their account.

Where can the Action Log be found?

1. Log into Vuzion CORE <https://core.vuzion.cloud>
2. Click Account on the left navigation pane
3. Click Action Log

A list of all actions will now be shown, alongside which user made the change. An

example is included below

Action Log

This is a list of all actions performed by all users registered in your account.

12 item(s) total [Show Search](#)

DATE ▾	ACTION	STATUS	USER	SERVICES
Jul 24, 2018, 3:17 PM	User Added John Smith	● COMPLETED	setup Team	User Management

From the above example, a new Admin user was created on the 24^h July 2018 by user Set Up Team. Content from the Action log cannot be deleted or altered.
