## How to Access the Classic View in CORE

### What is Classic View in Vuzion CORE?

Classic View is the Control Panel which was used by Partners prior to UX1 release.

It can still be accessed from UX1 and is best suited for Partners with a breadth of knowledge from the previous Control Panel or for Partners looking to utilise additional settings and configurations within Vuzion CORE.

### Where can the Classic View be accessed?

1. Login to Vuzion CORE <https://core.vuzion.cloud>
2. Along the top banner, click Classic View

This will now bring you into the Classic View Control Panel.
