

Configure Agentless Backups for Office 365 for Acronis Cyber Cloud

Last Modified on 23/01/2020 10:19 am GMT

If your subscription allows for Agentless Backups for Office 365, then a local Backup Agent is not required.

Instead, you will need to grant the Acronis application access to your data in Office 365 for backup.

You will need to have access to a Global Administrator of your Office 365 tenant to grant the required permissions.

Configure Agentless Backups for Office 365

1. Sign into your Acronis Backup

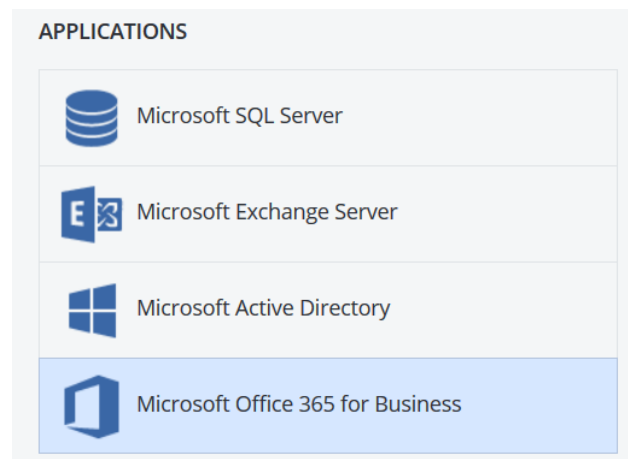

Console

A blue rectangular button with the word "ADD" in white capital letters.

2. Select **Add** in the top right corner

3. Select **Microsoft Office 365 for Business**

4. Select **Office 365 Worldwide**

5. Log in with your Office 365
Global Admin Account

6. **Accept** the requested
permissions

Permissions requested Accept for your organisation

Backup Service

[App info](#)

This app would like to:

- ✓ Read and write all groups
- ✓ Read and write all users' full profiles
- ✓ Read and write files in all site collections
- ✓ Sign in and read user profile
- ✓ Read and write managed metadata
- ✓ Read and write items and lists in all site collections
- ✓ Have full control of all site collections
- ✓ Read and write items in all site collections
- ✓ Use Exchange Web Services with full access to all mailboxes

If you accept, this app will get access to the specified resources for all users in your organisation. No one else will be prompted to review these permissions.

Accepting these permissions means that you allow this app to use your data as specified in their Terms of Service and Privacy Statement. **The publisher has not provided links to their Terms for you to review.** You can change these permissions at <https://myapps.microsoft.com>. [Show details](#)
